

BSN (RN-to-BSN) Course Descriptions

The following courses are required for completion of the RN-to-BSN degree at Lock Haven University. All of these courses are offered online.

Course	Course Description	Offered	Notes
NURS305-Nursing Informatics	An introduction to applications of informatics systems in nursing practice and education. Integrates various theories and assists students to develop skills for information literacy in the context of communication, self-expression, and social control in a diverse society and in the use of electronic patient records and tele-health. Provides an introduction to technology in nursing. Learning experiences provide for the development of baseline informatics and verbal and nonverbal professional communication styles needed in the healthcare delivery arena. <i>Semester hours: 3.0</i>	Summer II and Spring	Summer Session II: ASN students may enroll after Level I completed. GPA 3.0 and permission of advisor Offered 7.5 week subsession
NURS310-Foundations for Prof. Practice	A seminar course focused on the theoretical foundations of professional practice and theory development in nursing. Competencies this course fulfills: Written Communication (WC) <i>Semester hours: 3.0</i>	Fall	Offered 7.5 week subsession
NURS315-Pathophysiology	Studies the physiologic mechanisms altered by illness, injury, or disease processes in humans throughout the life span. Fundamental disease processes, specific illnesses, and their effects on homeostasis as well as the links between pathophysiology, diagnosis, and therapeutic interventions are emphasized. Students will critically analyze diverse client presentations of selected illnesses for symptomatology, pathophysiology, and health care implications. <i>Semester hours: 3.0</i>	Spring	ASN Students may enroll with GPA 3.0 and permission of advisor Full semester course
NURS320- Health Assessment	Focuses on identification and demonstration of advanced assessment techniques with emphasis on normal and abnormal findings throughout the life span. Learning experiences provide for development of a systematic approach to physical assessment to facilitate integration of assessment findings and major health deviations. Principles of therapeutic communication will be emphasized as an adjunct to performing a health assessment. <i>Semester hours: 3.0</i>	Fall	Offered 7.5 week subsession
NURS325-Pharmacology for Nursing	Designed to provide an overview for nurses of drug therapy integrating the use of the nursing process in pharmacokinetics. The emphasis is to provide a big picture approach to the systemic use of drugs in the treatment and or management of diseases. <i>Semester hours: 3.0</i>	Fall	ASN Students may enroll with GPA 3.0 and permission of advisor Full semester course

Course	Course Descriptions	Offered	Notes
